REGONDA UDAYASRI

Hyderabad, India | uregonda@gmail.com | +91 9290510835 | LinkedIn: linkedin.com/in/regonda-udayacri | GitHub: github.com/RegondaUdayasri

PROFESSIONAL SUMMARY

Computer Science & Engineering (AI & ML) graduate with strong data analysis, data management, data quality, data accuracy, reporting, process improvement and problem-solving skills. Experienced with Python, SQL, Pandas, data validation, monitoring, documentation and AI/ML workflows. Interested in Asset Management data, Security Reference & Price Data, Analytics, Index and Benchmark data, BAU delivery, operational stability, automation and workflow optimization, with strong attention to detail and collaboration.

EDUCATION

B.Tech – Computer Science & Engineering (AI & ML) | Nalla Narsimha Reddy School of Engineering, Hyderabad | CGPA: 8.78 | 2022–2026

EXPERIENCE

Summer of AI Intern – Swecha Organization | May 2024 – Jun 2024

- Supported AI/data workflows involving data processing, data validation, quality verification, documentation and monitoring.
- Reviewed AI/LLM outputs for accuracy and consistency, applying analytical skills and attention to detail to identify potential data-quality issues.
- Collaborated with team members using Git, communicated progress, and supported process improvement and workflow optimization.
- Managed assigned tasks within deadlines while maintaining accurate documentation and consistent output quality.

PROJECTS

AI-Integrated Traffic Management System | Python, Pandas, TensorFlow, LSTM, Flask, Plotly

- Performed data collection, data processing, data validation, analysis and visualization on traffic datasets to support forecasting and data-driven decisions.
- Built an LSTM forecasting workflow and reporting interface; monitored outputs, validated results and documented the analytical process.
- Identified opportunities for workflow optimization and automation through reusable Python-based data-processing steps.

Blockchain-Based Security System for Patient EHRs | Python, Flask, Solidity, Ethereum, IPFS, AES

- Developed a secure data platform with controlled access, data integrity checks and documented workflows for sensitive electronic health records.
- Built and tested REST APIs, validated system outputs and applied structured data-management and quality-verification practices.
- Applied problem-solving, documentation and process controls to support reliable handling of sensitive data.

TECHNICAL SKILLS

Data & Analytics: Data Analysis, Data Management, Data Processing, Data Validation, Data Quality, Data Accuracy, Reporting, Monitoring, Pandas, NumPy, Plotly, SQL

AI & Automation: Artificial Intelligence, Machine Learning, LSTM, TensorFlow, Generative AI, Workflow Optimization, Process Improvement, Automation

Programming & Tools: Python, Java, C, Flask, REST APIs, Git/GitHub, Linux, Microsoft Office, Microsoft Excel, VS Code

Professional: Analytical Skills, Problem Solving, Attention to Detail, Documentation, Quality Assurance, Risk Awareness, Stakeholder Communication, Team Collaboration, Time Management, Ownership, Adaptability

CERTIFICATIONS & ACHIEVEMENTS

- NPTEL – Data Analytics | NPTEL – Cloud Computing | IELTS Academic – Band 6.5
- 1st Place – Generative AI Hackathon | Solved 100+ HackerRank Problems | National-Level Handball Player

ADDITIONAL STRENGTHS

Strong first-principles problem-solving mindset
Hands-on SQL and data-driven decision making
Experience explaining concepts, reviewing code, and collaborating in teams
High adaptability to fast-paced startup environments
